STATE OF COLORADO

KREMML

Each color on the alternative map identifies a area where one land use will have priority ov management, development and use. It doe single use. The principles of multiple use ar yield are maintained in each priority area. Ma uses would be allowed in each area but one use priority. Other land uses would have limit them to prevent conflict with the priority use. a use may be totally incompatible with the Such a use would not be allowed.

As an example, blue identifies wildlife hab priority land use for certain areas. Some la totally compatible with wildlife habitat such a scenic areas and some forms of recreation. The can occur concurrently with wildlife habi conflict and with no limits placed on them.

Some land uses like livestock grazing, for production or oil and gas development are pa patible with wildlife habitat. In order for th occur concurrently, certain limits or restrictio required such as excluding or modifying so management practices on all or portions o reducing the size of projects or excluding cerain times of the year. (Refer to alternative the RMP/EIS document for specific restrictions

Other land uses such as surface development community expansion are incompatible w habitat and therefore would be excluded fro concurrently. (Refer to alternative narratives document for specific exclusions.)

COAL — Federal lands leased suitable for future c for coal leasing. Ne will occur only on

committed to oil

	WILDLIFE	Public lands committed to important wildlife habitat.
	SOILS	Public lands where soil erosion problems exist. Reducing soil loss is the priority for these lands.
	WATER	Manageable segments of surface water on public lands. Water quality will be maintained and protected.
	RECREATION	Public lands committed to Special Recreation Management Areas or Developed Recreational Sites.
	WILDERNESS	Public lands recommended as suitable for wilderness designation.
	CULTURAL RESOURCES	Public lands where significant cultural resources exist.
	SCENIC AREAS	Visually sensitive areas of public lands.
	COMMUNITY EXPANSION	Public lands suitable for expansion of communities.
	NO PRIORITY	Areas where no priority uses were identified. Present uses are expected to continue at or near present levels. These areas include both public lands and private lands with Federal mineral interests.
	NO JURISDICTION	Lands for which the Bureau has no management jurisdiction and are not covered by this plan.

OFF-ROAD VEHICLE (ORV) DESIGNATION

☐ LIMITED AREAS — Use of off-road vehicle is subject to restrictions deemed appropriate by the Area Manager. Restrictions may limit dates and times of use, limit use to designated roads and trails, limit the types of vehicles allowed and similar matters.

☐ CLOSED AREAS — Use of vehicles prohibited.

All other public lands are open. Off-road vehicles may be operated subject to the operating regulations and vehicle standards set forth in 43 CFR 8341 and 8343.
